Temarry Recycling

With over 20 years of experience as Owner-Operator of a Recycling Facility, Matt inherited his experience from his Grandfather who owned one of the few solvent recycling operations in the Los Angeles area for over 50 years prior to RCRA publication in 1976.

In the early 90's Matt's Grandfather decided to retire and in continuing with the family tradition, Matt decided to open the facility to serve his grandfathers old customers. After only 1 year in business, the Mexican authorities approached Matt to help serve a growing Maquiladora Industry (US manufacturing operations located on the Mexican side of border towns) as well as the Southern California market.

Introduction

If you are new to the concept of actually transporting your hazardous waste to Mexico, your first thought may be, “Hold on a minute. isn’t Mexico a little like the old West?”

Then questions like these tend to follow:

- How safe is it really down there?
- How does the waste get transported there?
- Am I responsible for my waste in Mexico
- What’s the benefit to me if I decide to transport it there?

In this ebook, we will dispell the myth and provide you with

concrete evidence that transporting your hazardous waste to Mexico is not only legal, but more efficient and cost effective.

Is It Really Legal?

It may be hard to imagine, but transporting hazardous waste to Mexico is not only legal, but in many cases, it's actually cheaper, safer and has a lower environmental impact than other forms of disposal.

What Makes It Legal?

Over 17 years ago, the EPA issued Temarry an Acknowledgement of Consent (AOC) letter that certified that the EPA has done their due diligence to confirm with the government of Mexico that Recicladora Temarry has all the necessary permits, is in good standing, and is authorized to receive listed imported waste.

Temarry Recycling must submit a new Notice of Intent (NOI) every year to EPA to request that a new AOC be granted for the following year.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
ENFORCEMENT AND COMPLIANCE
ASSURANCE

ACKNOWLEDGEMENT OF CONSENT January 28, 2015

MATT SONGER
TEMARRY RECYCLING, INC.
476 TECATE ROAD, P.O. BOX 100
TECATE, CA US 91980
CAR000194217

Re: Foreign Notice ID:
EPA Notice ID: 011154/1E/15

Dear MATT SONGER:

This letter, including the enclosures, serves as the Acknowledgment of Consent (AOC) for EPA Notice ID 011154/1E/15 for the following waste stream numbers: 1. This AOC letter is valid from January 26, 2015 to December 31, 2015.

Enclosed you will find special instructions for exports under this AOC, as well as a copy of the notice. Also appended are the consented values for your notice.

Sincerely,

A handwritten signature in cursive script that reads "Robert G. Heiss".

Robert G. Heiss, Director
International Compliance Assurance Division
Office of Federal Activities

How Does Temarry Do It?

As you can imagine, Temarry not only has to meet stringent requirements on the Mexican side of the border, but also meet the same TSDF requirements that all US facilities have to meet.

Temarry must hold approximately 17 permits each year in order to conduct business. A full list of all the required permits can be found on our website under the [Permits & License](#) page.

In Mexico, there are over 100 Technical Norms on Health and Safety. Some of the provisions that Mexican H&S regulations cover are:

- On the Job Safety
- Training Requirements
- Workers Environment (Exposure to HM)
- Chemical Substances (Right to Know)
- Machinery and Equipment safety
- Personal Protection Equipment
- Safety Signs and Color Codes
- Medical Surveillance
- First Aid
- Fire Prevention Brigade

All of these requirements, licenses and permits all add up to a company that has spent the better part of 20 years positioning itself to be the best TSDF facility serving the Western United States.

Who Has The Liability?

Where Liability Starts & Ends

US waste generators have always known that their liability ends once the disposal facility has disposed of their waste and they receive written confirmation.

The “Cradle to Grave” obligation.

When transporting hazardous waste to Temarry in Mexico, the US generators liability for the waste ends at the US border.

At the border, Temarry Recycling becomes the Principal Responsible Party in the U.S. and Recicladora Temarry de Mexico accepts generator liability in Mexico

How The Exportation Process Works

Compliance Procedure to Export Hazardous Waste to Mexico

RCRA Compliance:

Applicability of 40 CFR 262 Subpart E.- Export of Hazardous Waste 262.51, 262.52, 262.53

Consignee:

(Section 8 on Manifest) Recicladora Temarry de Mexico, S.A. de C.V. (Fully Approved Treatment Facility by Mexican EPA with U.S. EPA # MXC130619001)

Primary Exporter:

(Inserted into Section 14 OF Manifest) Temarry Recycling, Inc. (A US Based Company with EPA ID # CAR000194217)

EPA Acknowledgement of Consent:

Promoted by and received approval for Temarry Recycling from US EPA to export waste into Recicladora Temarry de Mexico. (Valid for 1 calendar year)

Receiving Country Consent:

Authorization from Semarnat to Import Hazardous Waste into Mexico to a specific Consignee (Recicladora Temarry de Mexico, S.A. de C.V.) (Valid for 1 calendar year).

Notice of Intent to Export:

Notification done by Primary Exporter (Temarry Recycling, Inc.) in order to obtain EPA AOC. Exports done through Temarry's services are covered for U.S. based generators. (Valid for 1 calendar year)

262.54 Special Manifest Requirements.- Primary Exporter compliance:

1. Designated Facility Information: (Section 8 on Manifest)
2. Recicladora Temarry de Mexico, S.A. de C.V. Can. Fed # 2 Mexicali-Tijuana Km 121, Col. San Pablo, Tecate, B.C. EPA ID: MXC130619001
3. In block 14 include Primary Exporter: Temarry Recycling, Inc.
4. Export Box on Manifest, Section 16 on Manifest, must be checked and Point of Exit will be: Otay Mesa, CA
5. No other changes to normal manifesting procedures

6. Consignee will return signed copy of the manifest confirming receipt of hazardous waste to the generator
7. A copy of the EPA AOC accompanies every shipment. Temarry prepares the documentation package before the truck enters US Customs compound
8. An additional copy is provided for delivery to US Customs official during crossing.

262.56 Annual Reports

Temarry Recycling files annual report with the US EPA Administrator no later than March 1 of each year for previous calendar year's activity of hazardous waste exports to Mexico.

262.57 Record Keeping

Temarry keeps records for more than 3 years as required by regulations.

CDX Central Data Exchange Reporting

GENERATORS THAT ALREADY EXPORT TO TEMARRY

Over 3000 waste generators served through 18 service companies including:

U.S Fish and Game

DRMO – U.S. Military

State of California

Numerous School Districts

Abbott Cardiovascular Systems

A Large Electric Car Manufacturer Based in Northern California and Nevada.

Sherwin Williams Paint

Jafra Cosmetics

Robertson's Industries

Hayden Industrial Products

Daimler Benz

Zodiac Aerospace

Please contact our Corporate Office for particular reference contacts.

The Manifest System

Export Process

The Manifest System / Cradel To Grave Liability

Most organic solids with fuel value and certain waste streams such as:

- Flammable solvents including alcohols
- Ketones
- Naphtha
- Paint related materials
- Flammable mixtures with and without halogens
- Halogens

can be recycled by Temarry. Non-RCRA waste including oils, oily water, antifreeze and latex paint, can also be processed by Temarry in a very cost effective manner.

All waste that is processed on site receives an H020 handling code for distillation or an H050 handling code for, "energy recovery at this site".

Shipping these types of waste streams to other parts of the country, is not only cost prohibitive, but creates a much larger carbon footprint than is necessary.

The Benefits of Transporting
